LIST OF CONTENTS FOR VOLUME 24, 1997

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1997 Volume 24, Number 1 January-February

Contents

D. Luo and S.M. Ghiaasiaan	1	Interphase mass transfer in cocurrent vertical two-phase channel flows with non-Newtonian liquids
S. Syrjälä	11	Numerical study of fully developed non-Newtonian fluid flow and heat transfer in a rectangular channel with a moving wall
S.M. Hosseinalipour and A.S. Mujumdar	27	Flow and thermal characteristics of steady two dimensional confined laminar opposing jets: Part I. Equal jets
S.M. Hosseinalipour and A.S. Mujumdar	39	Flow and thermal characteristics of steady two dimensional confined laminar opposing jets: Part II. Unequal jets
X.-Q. Chen and J.C.F. Periera	51	Computation of dispersed turbulent liquid-particle flows impinging a centerbody using an improved Langrangian stochastic model
C.-H. Wang, C.-J. Sun and H.-C. Kuo	65	An experimental investigation of heat transfer of a droplet impinging upon a hot surface
M. Gao and C.N. Reid	79	A simple virtual sphere method for estimating equilibration times in heat treatment
M.R. Malin and B.A. Younis	89	The prediction of turbulent transport in an axially rotating pipe
H.-S. Kou and D.-K. Huang	99	Fully developed laminar mixed convection through a vertical annular duct filled with porous media
T.N. Wong and Y.K. Yau	111	Flow patterns in two-phase air-water flow
R.M. Saldanha da Gama	119	The nonlinear conduction/radiation heat transfer phenomenon represented as the limit of a sequence of linear problems
S.J. Matysiak and O.M. Ukhanska	129	On two-dimensional heat conduction problem of a periodic stratified convective half-space with a moving heat source
B. Peureux, J.F. Durastanti and B. Martin	139	La réanalyse du transfert instationnaire de la chaleur

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1997 Volume 24, Number 2 March-April

Contents

M.A. Brich, V.L. Ganzha and S.C. Saxena	151	On the design of heat-transfer probes
W.-C. Chen, C.-C. Tsao and P.-W. Liang	161	Determination of temperature distributions on the rake face of cutting tools using a remote method
S. Schroeder, H.J. Viljoen, W.A. Kline and S.L. Rohde	171	The modeling of Au evaporation by W-filament heating
C.H. Leung, J.E.J. Staggs, A.C. McIntosh and J. Brindley	181	Heat transfer to an infinite solid through a moving boundary
J. Bonjour and M. Lallemand	191	Effects of confinement and pressure on critical heat flux during natural convective boiling in vertical channels
G. Ruocco	201	Entropy generation in conjugate heat transfer from a discretely heated plate to an impinging confined jet
U.H. Kurzweg and M.J. Jaeger	211	Flow rate determination in conduits using a thermal pulse technique
A. Beretta, P. Ferrari, L. Galbiati and P.A. Andreini	223	Horizontal oil-water flow in small diameter tubes. Flow patterns
A. Beretta, P. Ferrari, L. Galbiati and P.A. Andreini	231	Horizontal oil-water flow in small diameter tubes. Pressure drop
H.A. Abdel-Aal	241	A remark on the flash temperature theory
O.O. Onyejekwe	251	A Green element treatment of isothermal flow with second order reaction
K.A. Yih	265	The effect of transpiration on coupled heat and mass transfer in mixed convection over a vertical plate embedded in a saturated porous medium
D.A.S. Rees	277	The effect of inertia on the onset of mixed convection in a porous layer heated from below
D. Duncan and T.A. Trabold	285	Cross-duct electric field perturbation void fraction probe
Y.K. Shen	295	Study on the gas-liquid interface and polymer melt front in gas-assisted injection molding

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1997 Volume 24, Number 3 May-June

Contents

N.A. Park and T.F. Irvine, Jr.	303	Liquid density measurements using the falling needle viscometer
K.C. Leong and F.L. Tan	313	Effect of liquid superheat on freezing of N-hexadecane in a rectangular enclosure
H.T. Chang, L.W. Hourng and L.C. Chien	323	Nonequilibrium hydrogen combustion in one- and two-phase supersonic flow
T.-Y. Wang	337	The analysis of conjugate problems of conduction and convection for non-Newtonian fluids past a flat plate
T. Derbentli	349	A variational formation and Ritz solution of the radiative equilibrium of a plane slab
H.-S. Kou and P. Yuan	357	Thermal performance of crossflow heat exchanger with nonuniform inlet temperatures
V.G. Rajesh and K.P. Ravindran	371	Optimum heat pipe design: a nonlinear programming approach
Y. Demirel, H.H. Al-Ali and B.A. Abu-Al-Saud	381	Entropy generation of convection heat transfer in an asymmetrically heated packed duct
V.I. Rudakov and V.V. Ovcharov	391	Analytical solution of the diffusion equation for an extended source of infinite extent at constant temperature gradient
A.V. Kuznetsov	401	Influence of the stress jump condition at the porous-medium/clear-fluid interface on a flow at a porous wall
N.H. Afgan, J.C. Pereira, A.I. Leontiev and S.V. Puzach	411	Concept of porous wire anemometer
D.A.S. Rees and I. Pop	419	The effect of longitudinal surface waves on free convection from vertical surfaces in porous media
C.-H. Chen	427	Non-Darcy mixed convection over a vertical flat plate in porous media with variable wall heat flux
B.R. Becker and B.A. Fricke	439	Modeling transport processes in heat and mass releasing porous media
M.D. Mikhailov and R.M. Cotta	449	Eigenvalues for the Graetz problem in slip-flow

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1997 Volume 24, Number 4 July-August

Contents

C. Park, W.-P. Baek and S.H. Chang	453	Countercurrent flooding limited critical heat flux in vertical channels at zero inlet flow
S. Baskaya, A. Gilchrist and S.M. Fraser	465	The radial spread and axial decay of temperature in turbulent condensing jets
S.-C. Wu and C.-Y. Wu	475	Radiative heat transfer in a two-dimensional cylindrical medium exposed to collimated radiation
X. You and H. Herwig	485	Linear stability of channel flow with heat transfer: The important role of reference temperature
G.Ya. Aleshin	497	New working hypothesis of the "steam-explosion" phenomenon
R.L. Frederick	507	Natural convection heat transfer in a cubical enclosure with two active sectors on one vertical wall
M. Aydin	521	Dependence of the natural convection over a vertical flat plate in the presence of the ribs
S. Das and P. Razelos	533	Optimization of convective trapezoidal profile circular pin fins
S.D Harris, D.B Ingham and I. Pop	543	Free convection from a vertical plate in a porous media subjected to a sudden change in surface temperature
A. Campo	553	Rapid determination of spatio-temporal temperatures and heat transfer in simple bodies cooled by convection: usage of calculators in lieu of Heisler-Gröber charts
R.C. Aldredge	565	On the structure of turbulent premixed flames in high pressure combustors
D. Tolmac and M. Lambic	569	Heat transfer through rotating roll of contact dryer
M.D. Mikhailov and R.M. Cotta	575	Temperature oscillations in a slug tube flow
V.I. Rudakov and V.V. Ovcharov	579	Analytical solution of the diffusion equation for an instantaneous plane source at constant temperature gradient
C.Y Zhao and W.Q. Tao	587	A three dimensional investigation of turbulent flow and heat transfer around sharp 180-deg turns in two-pass rib-roughened channels

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1997 Volume 24, Number 5 September

Contents

M.R. Malin	597	Modelling flow in an experimental marine condenser
S.Gh. Etemad, A.S. Mujumdar and R. Nassef	609	Viscous non-Newtonian forced convection heat transfer in semi-circular and equilateral triangular ducts: an experimental study
X.-Q. Chen and J.C.F. Pereira	621	An efficient Lagrangian trajectory model for predicting complex turbulent two-phase flows using the curvilinear coordinates
J. Shen, K. Spindler and E. Hahne	633	Pool boiling heat transfer of propane from a horizontal wire
A.J. Chamkha	643	Similarity solution for thermal boundary layer on a stretched surface of a non-Newtonian fluid
S.K. Roy and B.L. Avanic	653	Laminar forced convection heat transfer with phase change material emulsions
T. Goto and M. Suzuki	663	A boundary integral equation method for analysis of natural convection
I.R. Shreiber	673	Evaluation of concentration field formation in bubbly purification pond exhaust gas
T.K. Aldoss and Y.D. Ali	683	MHD free forced convection from a horizontal cylinder with suction and blowing
C.-H. Wang, G.-J. Ueng and J.-J. Jehng	695	The extinction limits and near-limits behaviors of premixed ethanol/air flame
P.W. Gibson and M. Charmchi	709	Modeling convection/.diffusion processes in porous textiles with inclusion of humidity-dependent air permeability
M.D. Mikhailov and R.M. Cotta	725	Steady-periodic hyperbolic heat conduction in a finite slab
S.A. Noseir et al.	733	Solid-liquid mass transfer at gas sparged fixed bed of Rasching rings
R.C. Aldredge	741	Buoyancy influences on turbulent flame propagation in a Taylor-Couette flow reactor
Announcement	745	
Announcement	746	

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1997 Volume 24, Number 6 October

Contents

C. Fan and Y.I. Cho	747	Microscopic observation of calcium carbonate particles: validation of an electronic anti-fouling technology
Y.I. Cho, C. Fan and B.-G. Choi	757	Theory of electronic anti-fouling technology to control precipitation fouling in heat exchangers
S.-B. Wang and H.-S. Kou	771	Cooling effectiveness of cutting fluid in creep feed grinding
B.S. Yilbas and M. Sami	785	Convergence of time exponential decaying pulse to intensity step input pulse for laser heating of semi-infinite body
M.R. Malin	793	The turbulent flow of Bingham plastic fluids in smooth circular tubes
A.J. Chamkha	805	Similarity solutions for buoyancy-induced flow of a power-law fluid over a horizontal surface immersed in a porous medium
A.J. Chamkha	815	Hydromagnetic flow and heat transfer of a heat-generating fluid over a surface embedded in a porous medium
S.J. Matysiak and O.M. Ukhanska	827	On heat conduction problem in periodic composites
İ. Uzun and M. Ünsal	835	A numerical study of laminar heat convection in ducts of irregular cross-sections
S. Lünskens and J.N. Koster	849	Natural convection in isopycnic liquid
A.C. Briozzo, M.F. Natale and D.A. Tarzia	857	Determination of unknown thermal coefficients through a free boundary problem for a non linear heat conduction equation with a convective term
F.M.L. Traiano, R.M. Cotta and H.R.B. Orlande	869	Improved approximate formulations for anisotropic heat conduction
S.K.W. Tou and C.P. Tso	879	Improvement on the modelling of film boiling on spheres
N.T. Obot, L. Das, D.E. Vakili and R.A. Green	889	Effect of Prandtl number on smooth-tube heat transfer and pressure drop

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1997 Volume 24, Number 7 November

Contents

J.A. Cobbett and S.S. Cha	897	Radiative thermal loading on a laser rod at low-level energy pumping
J.H. Jeong and H.C. No	907	Mass transfer coefficient model for the analysis of volatile species transport between two phases
D.-G. Lee, H.-G. Kim, W.-P. Baek, and S.H. Chang	919	Critical heat flux prediction using genetic programming for water flow in vertical round tubes
C.H. Wang and G.J. Ueng	931	An experimental investigation of fuel droplet combustion under micro-gravity
S. Tavman, I.H. Tavman and S. Evcin	945	Measurement of thermal diffusivity of granular food materials
M. Özdemir and A.F. Özgüç	955	Porosity variation and determination of REV in porous medium of screen meshes
S.Gh. Etemad	965	Three dimensional laminar non-Newtonian fluid flow and heat transfer in the entrance region of a cross-shaped duct
M.R. Malin	977	Turbulent pipe flow of power-law fluids
H.A. Abdel-Aal	989	On the distribution of friction-induced heat in the dry sliding of metallic solid pairs
T. Elperin and A. Fominykh	999	Optimization of gas hydrate reactors with slug flow
A. Valencia	1009	Effect of pulsating inlet on the turbulent flow and heat transfer past a backward-facing step
Y.P. Chang and R. Tsai	1019	Natural convection in a square enclosure with a cold source
A.Z. Şahin	1029	Thermodynamic design optimization of a heat recuperator
D.J. Lee and W.W. Lin	1039	Regular-irregular bubble departure patterns of film boiling on a horizontal heating wire
C. Parthiban and P.R. Patil	1049	Thermal instability in an anisotropic porous medium with internal heat source and inclined temperature

INTERNATIONAL COMMUNICATIONS IN HEAT AND MASS TRANSFER

1997 Volume 24, Number 8 December

Contents

J.A. Cobbett and S.S. Cha	1059	Effects of high-level energy pumping on radiative thermal loading of phosphate laser glass
X. Fu, R. Viskanta and J.P. Gore	1069	A model for the volumetric radiation characteristics of cellular ceramics
S.K. Parihar and N.T. Wright	1083	Thermal contact resistance at elastomer to metal interfaces
S.H. Yang, W.-P. Baek and S.H. Chang	1093	Pool-boiling critical heat flux of water on small plates: Effects of surface orientation and size
K. Kahine, V.T. Nguyen and M. Lebouché	1103	Ecoulement de fluides non Newtoniens a travers des elargissements brusques
T.A. Ameel	1113	Average effects of forced convection over a flat plate with an unheated starting length
P. Nithiarasu, T. Sundararajan and K.N. Seetharamu	1121	Double-diffusive natural convection in a fluid saturated porous cavity with a freely convecting wall
H.A. Abdel-Aal, S.T. Smith and J.A. Patten	1131	On the development of surface temperatures in precision single-point diamond abrasion of semiconductors
P.-T. Hsu, Y.-T. Yang and C.-K. Chen	1141	Laminar film condensation on a finite-size horizontal wavy plate
B. Zamora and J. Hernández	1153	Influence of variable property effects on natural convection flows in asymmetrically-heated vertical channels
R.C. Aldredge	1163	An analytical model for flame propagation in low-Mach-number, variable-density flow
R.C. Aldredge	1171	A flux-limiting scheme for solution of the eikonal evolution equation
T.R. Nigmatulin and F.J. Bonetto	1177	Shape of Taylor bubbles in vertical tubes
V.D. Stevanovic	1187	An analytical model for gas absorption in open-channel flow
K.A. Yih	1195	The effect of uniform lateral mass flux on free convection about a vertical cone embedded in a saturated porous medium
	1207	LIST OF CONTENTS AND AUTHOR INDEX FOR VOLUME 24, 1997
